

Journal of Semiconductor Technology and Science

Call Papers for

Special Issue on Nano/Micro System Technologies

Journal of Semiconductor Technology and Science will publish an issue of Nano/Micro System Technologies. It will provide an overview of recent experimental and theoretical progress in the field of nano and microsystem technologies. It is intended to serve as a vehicle for summarizing and highlighting the major developments that have occurred over past few years.

Topics

- Fabrication technologies and processes
- Mechanical, thermal and magnetic sensors and actuators
- Sensor network
- Biological/chemical analysis system
- Systems and devices for wireless/optical communication
- Assembly and package
- Energy source and harvesting
- Microdevices for data storage
- Simulation and characterization

Authors wishing to have their contributions considered for publication in this issue, which will be published in September 2007 issue, are invited to submit an electronic copy of their manuscripts to Editor-in-Chief, Kukjin Chun. Manuscripts should be submitted in free style double spaced MS Word format as an email attachment. See <http://www.jsts.org> for detail. Both regular papers as well as letters are welcome.
